

HC801 Electromagnetic Door Suction Munal

Item Number: HC801

Product features: This product is Power On - locked, power-off - unlocked . It can be installed on the ground or on the wall. The adsorption deflection angle reaches 45 degrees, which can satisfy the fast and accurate suction of the two planes of the adsorption plate and the electric lock when the door opens to 90 degrees. In order to achieve the standard suction of the electromagnetic door. The electromagnetic door suction is equipped with an emergency interruption button. The interruption has no residual magnetism and is safer and more reliable to use.

Opening Angle: 90 degrees

Electrical Performance: Tensile Resistance: 130
lb/60 kg

Current: 60/120mA

Working way: Power On - Locked

Input: 12/24VDC \pm 10%

Wiring: 12VDC Red For V+ / Black For V-

Unit: (mm)
